BuildSoft
Constellation HomeBuilder Systems Inc.
14142 Denver West Parkway
Building 51, Suite 160
Lakewood, Colorado 80401

TO WHOM IT MAY CONCERN:

Wyndham Homes, Inc. is a builder of luxury single family and active adult communities. Wyndham Homes has been building homes in New York and Connecticut since 1989 and builds approximately 50 homes per year.

Wyndham Homes has been using BuildSoft since 1996. We chose BuildSoft because it is schedule-driven and because the schedule is integrated with all of BuildSoft's other features.

The integration of BuildSoft's project management component (which contains the scheduling and calendar features) with the estimating, accounting, and job costing components has allowed us to consistently deliver our homes on time and within budget.

BuildSoft's calendar feature has allowed us to stay on schedule because of its timely reminders to send purchase orders and work orders and make follow up calls. The calendar feature also gives us the ability to enter our own tasks and link them to the schedule which has proven to be very useful for our construction team.

BuildSoft's estimating component and its automated take off feature has allowed us to easily and accurately determine the quantities of materials and labor and has given us the ability to maintain a database with materials, components, and assemblies for each home. The estimating feature has also allowed us to create and maintain budgets and the accounting and job costing components have made it easy for us to stay within budget and control costs.

BuildSoft is truly unique and superior to other builder software systems and has proven to be an invaluable tool for our business.

Sincerely,

Randy Varnum
Controller
